

# 2018 Grid of the Future

MODERATOR: THE ROLE OF THE FEDERAL GOVERNMENT WITH THE FUTURE OF T&D

**Lou Oberski**  
**Director NERC Reliability Compliance**  
**Dominion Energy**

Lou Oberski is Managing Director, Electric Market Policy and NERC Compliance for Dominion Energy. He is responsible for administration of all aspects of Dominion Energy's corporate NERC compliance assurance programs and oversees Dominion Energy's involvement at NERC and its sub-regions.

Prior to his current position, his career at Dominion covered increasing management responsibilities in transmission engineering, operations, planning and maintenance.

Previous assignments have focused on developing, establishing and coordinating NERC and RTO policy at Dominion Energy with a particular emphasis on generation supplier policy at NERC and RTOs.

Mr. Oberski is a member of the North American Energy Standards Board, Board of Directors and past chair of its Executive Committee. He is currently Chair of EEI's Reliability Executive Advisory Committee and a member of the board of directors at both SERC and ReliabilityFirst serving as ReliabilityFirst's Chairman from 2016-2017. Mr. Oberski has been employed by Dominion Energy for over 33 years and holds a bachelor's degree in electrical engineering from Western Michigan University.
