At Alabama Power Company, the Power Delivery Organization is responsible for the construction, maintenance and operations of the electric infrastructure in its service territory. As the Connectivity & Innovation Manager, Arnab’s team is looking for ways to improve the reliability and security of the grid for our customers today while also adapting to future technologies and demands.

Arnab has spent 13 years in the utility industry in several roles within Alabama Power including substation maintenance, substation construction, protection and controls testing, and the transmission control center.

Arnab received his Bachelor of Science in Electrical Engineering from the University of Alabama as well as a Master of Business Administration degree from the University of Alabama-Birmingham.
