

Adrienne Collins

Senior Vice President of Power Delivery • Southern Company

Adrienne Collins is senior vice president of Power Delivery at Southern Company. She leads the Transmission Planning, Bulk Power Operations, Energy Management Systems, and Transmission Policy and Services organizations. Collins works with key industry bodies to advance energy policy.

Since joining the Southern Company system in 1998 as a distribution engineer at Gulf Power, Collins has held a number of key engineering and leadership roles at Gulf Power and subsidiary Georgia Power.

Collins received a bachelor's degree in Electrical Engineering from the University of Florida.

Previously, Collins was Gulf Power's vice president of Power Delivery and led the Distribution, Transmission and Supply Chain Management organizations at the former Southern Company subsidiary.

She co-led the Southern Company Power Delivery coordination of restoration for Puerto Rico's storm response. When Hurricane Michael devastated portions of northwest Florida, she was the executive lead for the unprecedented response to the unprecedented storm. As transmission general manager, she led the largest power grid expansion program in Gulf Power's history.

She's engaged in the industry and serves on the SERC and EIDSN boards of directors, on the Southeastern Electric Exchange Engineering and Operations Executive Committee, the Association of Edison Illuminating Companies and the North American Transmission Forum.

In the community, Adrienne serves in several impactful roles, including Board Trustee for the University of West Florida and chair of the Academic Affairs Committee.
